

Environmental Monitoring Certificate

Dates

Monday to Friday
May 29 to June 13, 2023

Location

Class & Field
Prince George

Details

12-day program
Facilitated by industry professionals

Industry demand for environmental awareness is rising as more natural resource projects emerge. LNG, mining, forestry, and oil and gas operations, among others, depend upon environmental monitors to advocate for the environment and minimize impact.

As a monitor you will seek to identify environmental impacts before harm is caused and determine if mitigation is effective.

Contact: **Duran Rabesca Brown, PGNAETA**
Phone: **250-561-1199 ext. 241**
Email: **duranb@pgnaeta.bc.ca**

Offered in Partnership with PGNAETA

The Environmental Monitoring Certificate introduces participants to theoretical and practical components of baseline and construction phase environmental monitoring.

This program offers extensive coverage of topics including:

- Role of the Environmental Monitor
- Legislation, Policy, and Permits
- Environmental Protection Plans
- Introduction to Compliance Monitoring
- Cultural Resource Management
- Sediment & Erosion Control
- Health & Safety
- Reporting and Communication
- Introduction to Basic Sampling
- Water Quality
- Spill Response Plans
- Mapping and GPS
- Vegetation Ecology
- Wildlife Mitigation Measures
- Amphibian Ecology
- Protection of Amphibians
- Aquatic Monitoring
- Fish and Fish Habitat
- Construction Activities in Sensitive Areas
- Bear Awareness and Safety
- Electrofishing
